PROFILE

I am Amponsah Denis, a web developer dedicated to helping companies build their business websites and web applications. With a strong passion for coding, I invest a lot of time in personal projects, significantly improving my technical skills. I possess extensive knowledge in various technologies, including JavaScript, ReactJS, NodeJS, Express, MongoDB, and GitHub. My continuous learning and hands-on experience ensure that I stay updated with the latest industry trends and best practices.

WORK EXPERIENCE

web developer at @CODESOFT India(remote) .2023 september-January 2024

- Project: E-commerce Website** Developed during my internship, this frontend e-commerce site showcases my web development skills with a responsive layout and a comprehensive product catalog. Link: [portfolio](#)
- Social Media Credential Manager:** Developed an application designed to securely store and manage social media account credentials. The app allows users to easily update and retrieve their login information, ensuring that their account details are organized and accessible while maintaining a high level of security. [livePage](#)
- Customer Records Tracker App** Built during my internship, this app efficiently tracks customer records with a user-friendly interface and real-time data synchronization. Link: [portfolio](#)
- Project: Small Business Startup** Guide Landing Page Developed during my internship, this landing page explains how to start a small business with clear, step-by-step guidance. Link: [portfolio](#)
